

Our Splendid World

*A Course on
Environmental
Studies for the
Primary Classes*

Based on the new NCERT syllabus for primary classes and the vision of the National Curriculum Framework 2005, Our Splendid World views the environment-related knowledge in the context of human values and relationships. The series emphasizes the socio-economic and cultural aspects of the environment. It is designed to encourage the child to develop a clear understanding of the relationship between the natural, social and cultural environments. Using a novel format, it introduces topics through key questions rather than dwell on concepts, to trigger the imagination of the child. Each question acts like a cue to help the child develop his or her own knowledge base in order to develop a closer connection with the outside world.

Key Features

- Engages the child in exploratory and hands-on activities for acquiring basic skills
- Helps the child gain knowledge based on personal experiences
